Profile

Results-driven Full Stack Software Engineer with 4+ years of experience building scalable web applications across frontend and backend systems. Strong expertise in JavaScript (Vue.js, Nuxt.js) and Python (FastAPI), with experience designing RESTful APIs, database models, and cloud-ready services. Proven ability to own features end-to-end, collaborate in cross-functional teams, and deliver reliable, maintainable solutions in fast-paced environments. Comfortable working across the full software development lifecycle, from system design to deployment.

Professional Experience

2025/06 – 2026/01
Netherlands

Backend Engineer

BitNorm

- Contributed to BN Community, a platform uniting crypto and blockchain investment enthusiasts.
- Designed and implemented backend services in Rust, focusing on performance, safety, and scalability.
- Built and maintained community infrastructure, including channels, member interactions, and engagement flows.
- Developed APIs and internal tools to support community growth, moderation, and real-time interactions.
- Collaborated closely with a small, fast-moving team to ship features quickly and iterate based on user feedback.
- Helped shape backend architecture decisions with an emphasis on reliability and extensibility in a Web3-focused environment

2024/12 – 2025/12
Nairobi, Kenya

Associate front-end Developer

Nathan Digital

- Collaborated with cross-functional teams to develop and maintain intuitive, user-friendly HR and payroll web interfaces using Vue.js and Nuxt.js, ensuring efficient user workflows for internal stakeholders.
- Integrated and maintained backend services using Node.js (Express), streamlining key HRMS functionalities such as employee onboarding, payroll processing, and attendance tracking.
- Engineered responsive UI components and layouts, ensuring consistent performance across all modern browsers and devices, while adhering to modern UX/UI principles.
- Utilized MongoDB for efficient and scalable data storage, contributing to the seamless handling of large volumes of employee and payroll records.
- Implemented secure API integrations with third-party services (e.g., attendance systems, tax calculation APIs), improving system extensibility and automating manual HR processes.
- Troubleshooted frontend issues and implemented fixes with speed and accuracy, ensuring uninterrupted service for end users across various departments.
- Participated in daily stand-ups and agile sprint cycles, contributing to planning, estimation, and continuous improvement of the HRMS features.
- Created detailed documentation and walkthroughs for internal HR users, improving onboarding efficiency and user self-sufficiency.

- Proactively proposed UI enhancements and feature improvements based on user feedback, increasing system usability and employee satisfaction.

2022/01 – 2023/01
Sydney, Australia

Full Stack Developer

Kdanalytics

- Employed cutting-edge technologies including Vue.js, Vuetify, HTML, and CSS to meticulously translate Figma designs into captivating and functional web pages, ensuring a seamless user experience.
- Maintained comprehensive documentation of system architectures, workflows, and coding standards, facilitating efficient collaboration and knowledge sharing among team members.
- Leveraged the power of Python FastAPI to architect and deploy robust and scalable API endpoints, driving optimal performance and scalability for our applications.
- Orchestrated seamless integration of SharePoint and Stripe APIs to augment functionality and enhance user experience across web platforms, optimizing workflows and enhancing transaction capabilities.
- Conducted meticulous code reviews, swiftly addressing bugs and issues to maintain flawless functionality and deliver optimal performance.
- Utilized MongoDB to craft functional databases, applications, and servers, bolstering backend operations and ensuring the seamless operation of the application.
- Spearheaded successful Stripe integration, optimizing payment processing functionality and enhancing user experience through streamlined transactions.
- Technologies utilized: Nuxt.js for frontend development and FastAPI for backend development, ensuring cutting-edge solutions and seamless integration across the stack.

2022/04
Remote

Freelance Web Developer

Fiver

- Proactively pursued ongoing professional development to stay abreast of emerging trends and advancements in web development technology, ensuring cutting-edge solutions and continuous innovation.
- Leveraged state-of-the-art web technologies, including HTML5, CSS3, JavaScript, and FastAPI, to engineer bespoke solutions tailored to the unique needs of diverse clients, driving business growth and success.
- Seamlessly integrated APIs into client applications, unlocking enhanced functionality and automation capabilities, thereby optimizing workflows and driving operational efficiency.
- Demonstrated proficiency in utilizing vanilla JavaScript for DOM manipulation tasks, ensuring seamless functionality and delivering an intuitive user experience.
- Harnessing the capabilities of Playwright and Selenium, executed proficient web scraping and data mining operations, extracting valuable insights and optimizing data acquisition processes for informed decision-making.
- Provided comprehensive user support to clients, offering tailored training, educational resources, and responsive assistance to address inquiries and enhance user understanding and satisfaction.

2021/01 – 2022/06
California, United States

FullStack Developer Intern

California Systems Inc.

- Reviewed and optimized codebase, resolving issues swiftly to ensure seamless functionality and performance.
- Collaborated closely with back-end developers to architect and implement efficient APIs using FastAPI, facilitating smooth data exchange and communication between front-end and back-end systems.
- Played a key role in requirements gathering, ensuring alignment with business objectives and identifying optimal technical solutions.

- Seamlessly integrated visual elements with back-end functionalities in collaboration with UX/UI designers, utilizing cutting-edge technologies like Vuetify, HTML, and CSS.
- Elevated user experience through the creation of responsive web designs, optimizing compatibility across all devices and media queries for a flawless browsing experience.
- Contributed to enhancing test pass rates, demonstrating a commitment to quality assurance and continuous improvement initiatives.

Education

2016/01 – 2019/11
Bondo, Kenya

Bachelor Of science: Business Information Systems
Jaramogi Oginga Odinga University Of Science and Technology

Skills

Frontend development
skills: HTML, CSS, Javascript, Vue, Nuxt

● ● ● ● ●

Backend Development
Skills: Python, FastApi

● ● ● ● ●

Storage
Skills: MongoDB

● ● ● ● ●
